Revenues aligned with EU taxonomy Defined with the actual regulatory scheme.

Total Waste increase vs. 2022 mainly due to non-hazardous waste at Viesgo increasing vs 12M 2022

Accident Frequency rate (LTM) as 1,56 in Rolling 12M. EDP continues determined to strengthen the culture of Occupational Health and Safety, having started in 2021 a new program, "Playitsafe", to raise awareness of the importance of building and adopting safe habits at EDP.

Regarding **Employee engagement** EDP continuously promotes the definition of action plans throughout the organization to respond to employee feedback, reinforcing employees engagement.

EDP España (including EDP Redes España) has once again received this year the **Top Employer certification**, awarded by the Top Employers Institute, the largest company certifying best practices in human resources management in organisations around the world.

In 2023 females' representation on leadership 22,6% is 4,0 points higher than the total number of female in the company (18,6%).

EDP Suma + continues its activity in distribution areas as Asturias, Cantabria y Lugo

EDP Redes España GRESB 2023 (2022 performance): Infrastructure Asset Sector Leader (100/100)

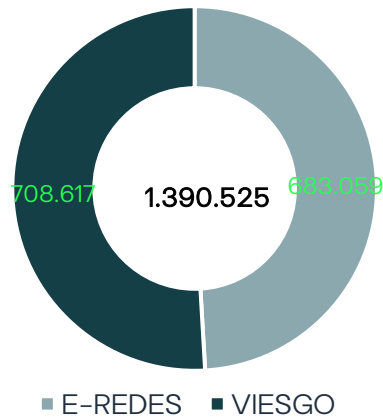

1. Scope 2 emissions according with GHG Protocol based location methodology. 2. 2030 as Carbon Neutral in Scope 1&2., Net Zero in 2030 for scopes 1 and 2 excluding network losses.

1. To assess the level of digitalisation, 4 variables were considered: Automation, Standardisation, Integration and Traceability and Data Driven. Driven. For the first two, the methodology defined by EDP was adopted, which is used to calculate the Digitisation KPI. In addition, surveys were carried out to measure the level of maturity in terms of Integrity and Traceability of the organisation's information and Data Driven of the organisation, thus obtaining a first wide measurement of the current status of the organisation..
2. Activities carried out through interactive voice response (IVR) or Websites

HIGHLIGHTS

Last November, the EDP ENERGY STARTER Bootcamp took place in Santander in its edition focused on smart grids. During 3 intense days, the 9 selected startups shared solutions in fields related to grid flexibility, asset management, environmental impact and management and other areas. The bootcamp was developed at EDP / VIESGO facilities, including focus activities, presentations by leading members of the industry and meetings with EDP experts. The objective is to size possible pilot projects between the company and the selected startups. The bootcamp had great media impact and a high rate of internal follow-up. 2 projects (Safeguard y Safegrid) have already been approved for launch in 2024. Additionally, 4 ((Cellgrid, Alteria, Synaptec y Beyond Vision) are in the definition and analysis phase.
